DEMA to Feature New Chemical Dispensing Systems

@ ISSA/INTERCLEAN, Amsterdam April 26-29

DEMA Engineering Company, with European Headquarters in Zeewolde, Netherlands will feature three new innovative chemical dispensing systems at the upcoming 23rd edition of ISSA/INTERCLEAN in Amsterdam, Booth 01-0009.

- The DEMA NITRO™ warewash dispenser fills the gap between large and basic dispensers. It offers large warewash dispenser features in a small, compact design for limited-space applications. It operates with or without a probe on a simple tank, door or conveyor machine. A customized concentration set-point is achieved with the variable detergent feed rate feature. The NITRO has a pre-wired power supply; pre-programmable, password-protected digital programming; and built-in rack counter.
- DEMA's TOP SHOT™ is an economical single-product laundry dispenser... ideal for self-serve, low volume or special one-product laundry applications. It utilizes the proven DEMA Olympian™ pump control platform. TOP SHOT programs via a plug-in 2-button programmer, with activation delay up to three minutes, pump run-time up to five minutes and lockout up to 60 minutes. Also, remote start switch has lockout to eliminate product misuse.
- The DEMA SQUIRT™ compact drain dosing dispenser answers limited-space kitchen locations. There's an easy-to-program electronic timer, programmable up to eight events per day and running on weekdays, weekends, everyday or just one day. Fast, tool-less tube changing is easy with the "quick-change" pump cover. The built in proven DEMA OLYMPIAN™ pump control assures reliability and durability. The SQUIRT has a splash-resistant ABS enclosure.

DEMA Engineering Company's worldwide headquarters are located in St. Louis, Missouri, USA. European headquarters are in Zeewolde, Netherlands. Additional sales warehouse locations are: Sidney, Australia; Shanghai, China; and Sao Paulo, Brazil. DEMA works through a worldwide network of distributors and representatives.
