DEMA INTRODUCES RAPID FIRE™ SPRAY AND FOAM DISPENSER

This new RAPID FIRE™ DEMA spray and foam dispenser is aptly named, as there's total, full water flow when valve opens. There's only one control knob for water flow and chemical selection, preventing any mixing of chemicals, insuring accurate, proper dilution and generally eliminating confusion.

The removable injector is easily maintained and all internal components are long-lasting, chemical-resistant polypropylene construction. Wand loss or damage is prevented with the built-in foam wand hanger. The optional hose hanger has a unique hose "strain-relief" feature.

This dispenser can be accessorized to fit the application's particular needs with a full range of hoses, foam wands, spray guns, nozzles and hose hangers.

The RAPID FIRE™ dispenser is ideal for cleaning and sanitizing supermarket meat rooms, seafood and meat departments, kitchen and food preparation areas, food processing and packaging plants and school and health club locker rooms and showers.

DEMA Engineering Company's worldwide headquarters are located in St. Louis, Missouri, USA. European headquarters are in Zeewolde, Netherlands. Additional sales warehouse locations are: Sidney, Australia; Shanghai, China; and Sao Paulo, Brazil. DEMA works through a worldwide network of distributors and representatives.
