

## WAREWASH DISPENSERS FILL THE GAP BETWEEN LARGE & BASIC DISPENSERS

The DEMA NITRO warewash dispenser offers large warewash dispenser features in a small, compact design for limited-space applications. It operates with or without a probe, from the same unit on a single tank, door or conveyor machine. A customized concentration set-point is achieved with the variable detergent feed rate feature. There's also a pre-wired power supply; pre-programmable, password-protected digital programming; and built-in rack counter.

Easy-to-operate traditional analog programming is also available with the NITRO EXPRESS Model of this unique dispenser.
