

LAUNDRY SOLUTIONS: LOW VOLUME & COIN-OP

The economical single product laundry dispenser

Sprint offers an economical and simple approach to basic laundry needs. It's physical size and pump performance makes it perfect for small OPL applications such as residential and coin-op laundry machines. The system can accommodate laundry detergent, bleach, or softener chemical products. The Sprint uses a control board to program the run and lock out time settings, making dosage adjustments as simple as a turn of the knob.

Features & Benefits

- Prewired – Connect to a 24, 115 or 230VAC source that will provide chemical charge while the laundry machine is filling
 - Prewired trigger signal for 24-230VAC source
- Mounting bracket – Attach the mounting bracket to the wall with screws and anchors that are included in the installation kit
- Compression nuts – Connect the chemical pickup and discharge lines to the spring pump using the 1/4" compression nuts on the inlet and outlet of the pump
- Run and lockout time – Adjustable run and lock out times make Sprint a versatile tool for a variety of needs, run time available between 10-120 seconds (with one second increments) and lockout time is in intervals of 0, 20, 25, 30, 35 and 40 minutes and programming is as simple as turning a knob
- Service easily – With a quick change pump, Sprint can be serviced within a matter of minutes, not hours
